

Ortel launches Net telephony

Service to help business users

OUR BUREAU
Bhubaneswar, 27 July

Orissa-based Ortel Communications Ltd has announced the commercial launch of its Internet telephony services (ITS).

Better known as the cable TV service provider under the brand name SkyView and for its broadband Internet services for homes and commercial establishments, In-

ternet telephony is the latest addition to the range of services provided by Ortel. This makes the company one of the few companies in the country to provide triple play service to its customers. ITS refers to communication facilities like voice, facsimile or voice messaging applications that are transported via broadband Internet technology rather than the public switched telephone network.

"The company is continuously upgrading its technology in line with international development and plans to launch many such contemporary services for its customers in years to come", said B P Rath, vice-president (corporate) of Ortel.

The new service will help Ortel customers in Bhubaneswar, Cuttack, Rourkela, Sambalpur, Khurda, Puri and Paradeep, he added.
